MIX WELL BEFORE USING

Directions For Use: NutriMend is designed to provide nutrients primarily as a soil applied treatment, supplying nitrogen and phosphorus, as well as micronutrients and water-soluble calcium. The acidic nature of NutriMend will help reduce water and soil bicarbonates making calcium and other micronutrients more available for plant uptake. NutriMend should be applied as a pre-plant treatment with follow up post-plant treatments as desired.

Application Rates:

- Agriculture: Apply 4 to 6 gallons/acre of NutriMend immediately after planting. Apply NutriMend to obtain thorough coverage of the targeted area. Add additional water, if necessary, to drive the product into the top 1 to 4 inches of soil. If follow up applications are desired, apply NutriMend at 1 to 4 gallons/acre. Use enough water to treat the root area. NutriMend may be applied as a soil surface spray, then watered in, or injected into irrigation water including all types of drip irrigation or flood systems.
- Turf: Apply NutriMend at a rate of 8 to 16 fluid ounces / 1000 sq. ft. of turf area. Water product into the top 1 to 4 inches of soil. Avoid overwatering and leaching the product out of the root zone, particularly on greens / tees. Apply every 7 to 21 days as dictated by desired growth and recuperative ability.

NutriMend is compatible with many other liquid fertilizers. NutriMend contains calcium and exhibits a low pH. Do not combine with fertilizers containing sulfate or thiosulfates. Always conduct a jar test to verify compatibility of NutriMend with other fertilizer materials. If blending with other fertilizers, use immediately after mixing.

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.html

Warning
Causes skin & serious eye irritation
Harmful to aquatic life

PRECAUTIONARY STATEMENTS

Prevention
- Wash thoroughly after handling.
- Do not eat, drink or smoke when using this product.
- Wear protective gloves and eye/face protection.
- Do not breathe dust/fume/gas/mist/vapors/spray.

General Advice
- Immediately call a poison control center or doctor.
- See below or SDS for specific advice and treatment.

Eyes
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- If eye irritation persists: Get medical advice or attention.

Skin
- IF ON SKIN (or hair): Wash with plenty of water. If skin irritation occurs: Get medical advice or attention.

Inhalation
- Remove victim to fresh air and keep at rest in a position comfortable for breathing.
- If breathing is difficult administer oxygen, if available. Call a doctor immediately.

Ingestion
- IF SWALLOWED: Call a poison control center or doctor.
- Rinse mouth thoroughly.
- Do NOT induce vomiting.

Storage and Disposal
- Store in original, labelled container and keep sealed.
- Store in a cool, well ventilated area out of direct sunlight.
- Dispose of contents and/or container in accordance with local/regional/national/international regulations
- Observe precautionary statements with emptied containers as residues may be hazardous. Do not use this product for any other purposes than what is shown on this label.
