Net Weight: 2612.5 lbs. / 1185 kg

MIX WELL BEFORE USING

Directions For Use: NutriFusion can be used as part of a comprehensive nutritional program for a wide range of crops. This product is best applied as a soil application but may also be applied foliarly. General rates range from 1 to 5 gallons per acre (GPA) depending on the crop and timing. Rates of 2 to 3 GPA are typically best suited for most crops and timings. Always check compatibility before use.

Soil Applications (in-furrow, drip or flood/water run): Note dilution ratios below. Soil applications should be made to achieve adequate soil moisture and penetration into the root zone.

Foliar Application: Use an adequate amount of water to obtain best coverage and avoid phytotoxicity. For tolerant plant types, use at least 10 gallons water for every 1 gallon of NutriFusion. For sensitive plant types, use at least 20 gallons water for every gallon of NutriFusion.

Application Methods	Minimum Dilution Rate NutriFusion : Water	Application Rate
In-Furrow	1 : 2	1 to 3 gallons/acre
Root Drench	1 : 9	2 to 5 gallons/acre
Foliar	1 : 10 or as needed to achieve coverage	1 to 4 gallons/acre
Alfalfa: break in dormancy between cuts & post-harvest	1 : 9 or as needed to achieve coverage	1 to 4 gallons/acre
