

1-0.5-0.5 GUARANTEED ANALYSIS

Total Nitrogen (N).....1.0%
 1.0% Urea Nitrogen
 Available Phosphate (P₂O₅).....0.5%
 Soluble Potash (K₂O).....0.5%

Derived from: Urea, Phosphoric Acid and Potassium Hydroxide.

ALSO CONTAINS A NON-PLANT FOOD INGREDIENT:
 0.085% Sodium Polyacrylate, Crosslinked

Purpose: Polymer is added to increase soil water-holding capacity.

Density: 9.0 lbs./gal. at 68° F

MIX WELL BEFORE USING

Directions For Use: This product is intended for use during planting, transplanting or seeding operations in conjunction with a sound fertility program. Thoroughly agitate product, then dilute with water in a 1:1 ratio. Agitate again before application to ensure ingredients are uniformly suspended in solution. NOTE: You may dilute with up to three parts water per one part EnviroMoist for sensitive plant types or varieties. When unsure, use the more dilute mixture.

Turf (pre-plant treatment of sod, sprigging or seeding): Apply 12 gallons of diluted EnviroMoist per 1,000 square feet. Apply to soil surface before laying sod.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rains are expected. Apply this product only to your lawn/garden. In Virginia, this lawn/turf fertilizer contains phosphorus and is only for non-agricultural use on (i) turf during its first season, (ii) turf areas being repaired or renovated and (iii) on turf where a soil test is performed within the last three years indicating a phosphorus deficiency. This fertilizer is not for routine maintenance of turf.

Containerized woody nursery stock (ornamental fruit / nut trees & shrubs) and landscape plantings:

Container Size (gallons or as indicated)	Diluted EnviroMoist Application Rate
1	2 fluid ounce/container
3	3 fluid ounce/container
5	4 fluid ounce/container
15	4-6 fluid ounce/container
24 Box	9-12 fluid ounce/container

Spray the diluted product directly onto the root ball or spray the exposed sides and bottom of the planting hole. Apply according to container size.

Bare Root Stock (fruit / nut orchards, grapes, nursery field plantings): Apply sufficient diluted solution to thoroughly coat the roots (usually six to 10 fluid ounces per plant). NOTE: you may dilute with up to three parts water per one part EnviroMoist for sensitive plant types or varieties. When unsure, use more dilute mixture.

Danger.
 Causes severe skin burns and eye damage.

PRECAUTIONARY STATEMENTS

Prevention

- Wash face, hands and any exposed skin thoroughly after handling.
- Wear protective gloves and clothing, as well as eye/face protection.
- Do not breathe dust/fume/gas/mist/vapors/spray.
- Do not handle until all safety precautions have been read and understood.

General Advice

- Immediately call a poison control center or doctor.
- See below for specific treatment.

Eyes

- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Skin

- IF ON SKIN (or hair): Immediately remove all contaminated clothing. Rinse skin with water/shower.
- Wash contaminated clothing before reuse.

Inhalation

- IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Ingestion

- IF SWALLOWED: Rinse mouth.
- Do NOT induce vomiting.

Storage and Disposal

- Store locked up in original, labeled container and keep sealed.
- Do not store in direct sunlight for extended periods or allow to freeze.
- Dispose of contents/container to an approved waste disposal facility.
